***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to a method of treating obesity.

Group II, claim(s) 8-15, drawn to a method of stimulating as pattern of gastric motility.

Group III, claim(s) 16-18, drawn to a method of increasing weight.

Group IV, claim(s) 19-21, drawn to a method of preventing gut motility.

Group V, claim(s) 22-24, drawn to a method of identifying a compound.

Group VI, claim(s) 25-31, drawn to a pharmaceutical composition.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I-V are drawn to completely different methods which sometimes function in completely different ways (ie. treating obesity vs. increasing weight, and increasing gut motility or decreasing gut motility). The claimed methods can be accomplished through various prior art compounds not in Group VI. The pharmaceutical of Group VI can be used in the various methods of Groups I-V!

A telephone call was made to Leon R. Yankowich on July 31, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1615

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
